Thanks Dave! That was exactly the way I planned to represent them in the permit application. Thank you.

Subject: RE: PSC 8 & PSC55

Adrienne, I have spoken about this with Merlin Russell who had received a call from Jane on whether the permit would need to be modified to incorporate the combined PSCs. My suggestion is that the two PSCs be combined and from now on called PSC 8/55. This makes sure that if someone is trying to track what has happened at PSC 55 from start to finish that it doesn't just disappear. Someone could probably figure out what had happened if they knew where to look, but if goes forward as PSC 8/55, it hopefully will be clear through the record. We have done this before with a couple of sites at the former Homestead AFB. Below I've added Merlin's e-mail to Jane.

Jane,

Dave clarified that you are basically combining two SWMUs (PSC 8 and PSC 55). Dave says it makes sense so it's fine with me. He suggests calling it PSC8/55 so that if PSC 55 is tracked by someone (beginning to end), it simply does not "disappear". I hope that makes sense.

A mod is not necessary at this point. Make the changes during the renewal.

merlin

Subject: PSC 8??

Hi Pete & Dave,

Hi Pete & Dave,

Attached is a letter requesting a boundary change for PSC 8. We are proposing to change the boundary of PSC 8 to include PSC 55. It will preferable to only write one RI/FS when the time comes and all supporting documents. Obviously that will be fewer documents for review as well. They are contiguous (see map attached) and both were WWTP disposal sites. Let me know your thoughts.
